20 February 1967

MEMORANDUM FOR THE RECORD

SUBJECT: New Non-USIB Funding Arrangement

25X1A9a

1. After studying the Memo for the Record, same subject, of 17 February, [REDACTED] called to report that he and Ed Proctor found the increased cost resulting from proposed manpower and population inputs to Section 4 too high and unacceptable. He said the cost was much too high in comparison with OCI expenditure for the same production. Also, he said, there was a misunderstanding on the beginning date for the Labor/Census inputs, that Proctor had intended them to begin in FY 70, with only a "pilot" project before that time.

25X1A9a

2. [REDACTED] is restoring the \$40,000 to FY 68 and FY 69 (which he had deducted for the Welfare unit) to pay for the pilot project. In the meanwhile OBI is to ascertain more clearly the nature and extent of OCI needs regarding inputs from Labor/Census and arrive at what the O/DDI would accept as a more realistic figure.
